Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 18 objected to because of the following informalities: Claim 18 discloses "a receiving receptacle having a receiving space in which the fixing member and the lamp are coupled to the fixing member". It is unclear what applicant means by the fixing member and lamp are coupled to the fixing member, and which fixing member applicant is referring to at the end of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18,19 are rejected under 35 U.S.C. 102(b) as being anticipated by Altman et al (6,217,190).

3. Altman discloses a lamp to generate light (30), an electrically conductive fixing member (15) having a base substrate (27) so as to fix a fixing clip(17) protruded from an upper surface(20) of the base substrate so as to fix the lamp and a fixing protrusion (28) integrally formed with the base substrate so as to prevent the lamp from moving a longitudinal direction of the lamp and a receiving receptacle(15,inner portion) having a

receiving space in which the fixing member and the lamp are coupled to the fixing member; The fixing protrusion is positioned between and end portion of the lamp and the sidewall of the receiving receptacle so as to prevent the lamp from moving towards the sidewall of the receiving receptacle(figs 1-2)

Allowable Subject Matter

4. Claims 1-17,21-25 are allowed.
5. Claim 20 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not teach a first fixing portion formed by partially cutting away the base substrate and a receiving receptacle having a receiving space in which the fixing member is received having a first fixing protrusion inserted into the first fixing portion which is protruded from the bottom surface of the base substrate.
